INTRODUCTION

Emme Brasil and Messe Düsseldorf, along with all partners involved (exhibitors, stand assemblers, service providers and visitors) must follow all requirements and recommendations to make the fair area as safe as possible, amidst the pandemic. Countless industries and commercial operations were affected by the current scenario, relying on platforms to present their products and innovations, and keep track of current demands.

We have created a safety protocol based on best market practices recommended by the UFI (Global Association of the Exhibition Industry) and the WHO (World Health Organization) to mitigate risks of contagion during the event and ensure the safety at the venue.

This will allow us to carry out the Medical Fair Brasil event.

We will be glad to welcome you to our event.

Enjoy your reading!

ENTRY / ACCESS TO VENUE

The following fair access measures will be implemented:

- Temperature measurement of all participants. Those with temperature equal to or higher than 37.8°C will not be allowed to enter the venue and will be taken to the medical station to retest temperature and receive further guidance;
- Access control with badges;
- Access control with badges;
- 70% isopropyl alcohol to sanitize hands.
- Mandatory proof of vaccination against COVID-19;
- Free lockers for visitors.

(Click here to see how it will be measured)

ONLINE REGISTRATION

In order to avoid agglomerations, participants must sign up online (exhibitors, visitors, press members and service providers).

Those who arrive at the event without previously signing up online must sign up with their own phones to reduce queues and minimize contact with other people.

GENERAL HYGIENE MEASURES

SANITIZER DISPENSERS

Medical Fair Brasil will install 70% isopropyl alcohol dispensers in all entrances, rooms and hallway transitions. Dispensers will also be available in restrooms. We will have a health center equipped for first aid and ambulance for removal when necessary.

DOORS

Doors will be kept open to avoid contact with door handles, except for fire doors, which will be equipped with electronic and automatic locks.

VENTILATION

Side doors will be kept open to improve air circulation.

EXHIBITORS / STANDS

STRUCTURAL / TECHNICAL MEASURES

All exhibitors of equipment and accessories with products in exhibition must implement a periodical equipment cleaning routine. It is recommended to clean and sanitize equipment after each use or contact.

HAND SANITIZERS

Exhibitors must provide general sanitizers in visible locations (e.g. 70% isopropyl alcohol).

CATERING

Hygiene requirements must be rigorously followed when preparing and handling food products. Placing recipients with peanuts, snacks, candy and other products are not allowed. Only individually packed and premade food items may be provided in the stand. Example: canned drinks must be sanitized before consumption and must only be consumed by a single person after opening. Catering services may only be provided upon fulfilling all of the aforementioned requirements.

COMMUNICATION

These measures will be extensively disclosed to exhibitors, visitors, service providers and press members, in order to inform the required actions to mitigate the risk of Covid-19 contamination.

ASSEMBLING / SERVICE PROVIDERS

Work conditions: stand assemblers must abide by all applicable rules provided in the exhibitor manual, and especially the rules established in the special pandemic safety protocol.

Stand assembling and decoration companies must provide a constantly updated list of staff involved. The list must be available at all times upon request by the organizers or health authorities. All workers are required to wear PPE during assembly procedures. During the assembly period, workers' temperature will be measured and those with a temperature equal to or higher than 37.8°C will not be allowed to access the venue.
